

MAYA CHEN

CO-FOUNDER & CEO · ROBOTICS SYSTEMS

Berlin, Germany · maya.chen@example.invalid · +49 30 00000000

PROFILE

Robotics operator with 10+ years across autonomous systems, industrial deployment and customer discovery. Built multidisciplinary teams that moved sensing products from prototype to field acceptance. Co-founding Aether Robotics to make industrial inspection evidence faster to review and easier to act on.

EXPERIENCE

Aether Robotics · Co-founder & CEO 2024–present

- Won two paid industrial design partners and translated site workflows into a focused product roadmap.
- Led field validation of a robot-mounted sensor payload and review-software prototype.
- Defined the seed plan: EUR 100,000 for one 90-day repeatability sprint.

Nordwerk Automation · Director, Field Systems 2019–2024

- Owned deployment readiness for mobile inspection systems across European industrial sites.
- Introduced acceptance metrics that connected sensor performance with operator decisions.

Vector Autonomy Lab · Robotics Engineer 2015–2019

- Developed perception and calibration tooling for autonomous platforms in constrained environments.

EDUCATION & CAPABILITIES

M.Sc. Robotics

Technical University of Munich · 2015
